REHAB SHOWER COMMUNE CHAIRS
The Choice of Health Care Professionals

INTRODUCING THE NEW LOW COST JAZ AP & SP

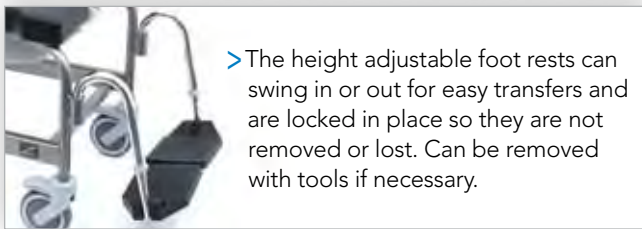

- > The JAZ AP and SP are the NEW low cost high quality light weight aluminum Shower Commode Chair
- > RAZ quality in a low cost model for hospitals and long term care facilities
- > Ideal for home use when a simple comfortable Shower Commode Chair is all you need
- > Available in AP and SP version
- > Soft, comfortable 18" x 16" contoured open front seat
- > Solid backrest for comfort and easy cleaning, adjustable in two positions 15" & 17" high
- > Swing in/out non-removable foot rests
- > Padded flip-up armrests
- > JAZ AP includes four, 5" dual locking casters
- > JAZ SP includes two, 5" dual locking casters and 22" adjustable rear wheels

JAZ MODELS
WILL BE AVAILABLE
SPRING 2012

- > The contoured solid seat and back are conformable and supportive for the user and are easy to clean and disinfect after use.

- > The height adjustable foot rests can swing in or out for easy transfers and are locked in place so they are not removed or lost. Can be removed with tools if necessary.

INFECTION CONTROL

Infection Control and prevention is a high priority for RAZ, we have a dedicated focus on this issue, investing a great deal of effort in making our commode chairs easy to clean. The New JAZ Models and the New Harmony Backrest is an example of this. The Harmony Back is designed to enhance comfort with its soft feel, provide support with its contoured lines and improve aesthetics with its attractive look.

The JAZ AP and SP with its solid back and simple Aluminum frame design along with the addition of the Harmony Backrest and the Stainless Steel electro-polished frame of the RAZ Shower Commode Chairs are much easier to clean and keep clean than any other commode chair on the market. Simply spray the chair with hospital grade disinfectants such as Virox and hose clean with warm water after use.

RAZ has created the most configurable, adjustable and comfortable rehab shower chairs on the market today. The chairs were developed with meticulous attention to detail — from the electro-polished stainless steel frames with easy access for users and caregivers, to precisely contoured seats molded with soft integral skin foam. Only RAZ offers a commode seat that adjusts to accommodate pelvic rotation with a centering of the aperture around the user's ischial tuberosities.

RAZ Rehab Shower Commode Chairs, provide positioning, pressure reduction, promote function and are ideal for the rehab client and the institutional user.

WHEN SEATING IS IMPORTANT, CHOOSE RAZ...

ISCHIAL PELVIC ALIGNMENT SEAT (IPAS)

Recognizing that many users spend lengthy periods of time sitting, we knew the seating for the RAZ Rehab Shower Commode series was a critical element. The IPAS was developed with contours to increase pelvic stability and reduce pressures over the ischials and coccyx. The IPAS provides 2" of seating depth adjustment and can be fitted with optional seat spacers for seat angle adjustment. The IPAS is available in 16" or 19" depths with open or bridged front.

IPAS BRIDGED FRONT SEAT

IPAS OPEN FRONT SEAT

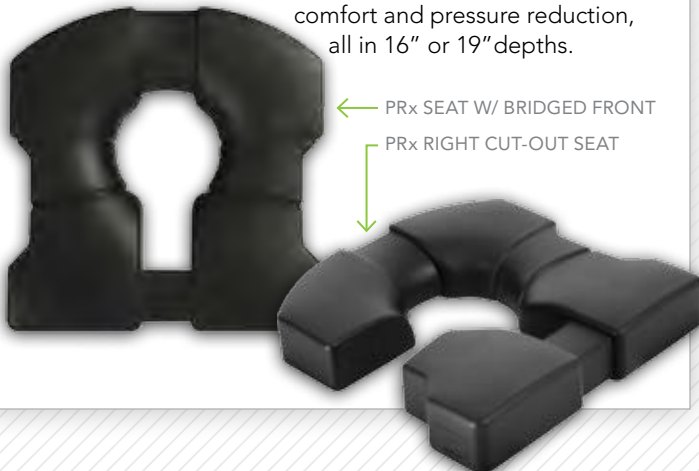

PRESSURE REDUCTION SEAT (PRx)

For users with more complex seating requirements the PRx seat is a new addition to the seating line up replacing the Visco elastic interface seat. The PRx is made with a high density foam base foundation, designed to provide superior stability and contours, while the surface layer of self-skinning gel foam provides a soft interface against the body. The PRx seat is available in ten configurations including left, right and rear cut-out for improved access or full seat models for comfort and pressure reduction, all in 16" or 19" depths.

PRx RIGHT CUT-OUT SEAT

Exclusive RAZ-AT Features

ADJUSTABLE PIVOT POSTS

- > Provides 4" of seat height adjustment without frame-toilet bowl interface
- > Pressurized gas springs work against gravity making tilting up to 40° easier for an attendant

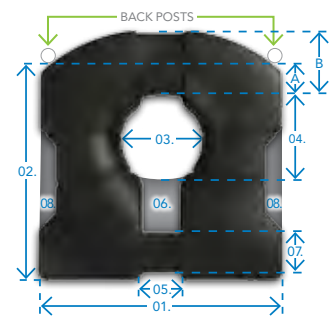

TILT ASSIST PEDAL (option)

- > Enables attendant to use additional strength from legs to tilt larger/heavier users
